Project Proposal for Amusement Park Management System

AFNAN AHMED - RA2211042040009 NANCY CHRISTINA - RA2211042040041

Project Title:

Amusement Park Management System

Introduction:

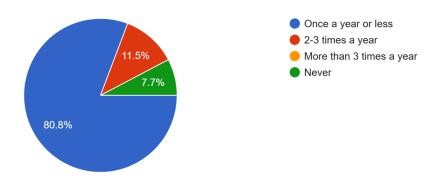

The Amusement Park Management System is designed to streamline and enhance the operations of amusement parks. This system will manage essential aspects such as ticketing, rides scheduling, visitor management, staff management, food and beverage outlets, and customer feedback. It aims to provide a seamless and enjoyable experience for visitors while ensuring efficient park management.

Do you have any suggestions on how amusement parks could improve the ride queue experience?

No

Nil

N/A

Yes

_

Use of Smart Bands like in Disney park

Smart queue system sounds good

NA	
no	
nil	
Have other fun things to keep people engaged while waiting, or come up with technology incorporated solutions like this smart queue system	
Well they can just give a time stamp	
None	
Adding similar rides for age group wise	
Be active instead of being lethargic	
No	
N/a	
Smart Queues are a good idea to go about it	
Should be cost friendly, should be user friendly and should be well notified	
People go to enjoy so if these parks can give best memories by safety, good environment and reasonable cost people will frequently visit the place	

Conclusion:

The Amusement Park Management System will be a comprehensive solution for managing day-to-day park operations efficiently while elevating the visitor experience. By leveraging modern technology, this project promises to provide value to both administrators and visitors, ensuring smooth park operations and memorable guest experiences.
